

Annual Report of the 9th Fiscal Year

From 2021 July 1st. to 2022 June 30th.

Education A-cubed (NPO)

1. Accomplishments for the year

Our mission "Anyone can be anything!" means to make a society which anyone can become anything according to their efforts, regardless of their backgrounds. Our main target is economically challenged children, especially the ones who do not fit into the existing educational system due to various reasons such as developmental challenges. We work to solve the social issues of disparities in educational and experiential opportunities caused by economic disparity and cycle of poverty.

Our "Study Place Project" has been operating a multifunctional learning/studying place called "Study Place" in low price by making use of ICT in the field of education. It enabled an access to educational and experiential opportunities to children from economically challenged backgrounds in Fukuoka, Japan. Study Place supports children from elementary to high school as alternative school, correspondence high school, cram school, and after-school classes which offers a variety of educational programs.

The project offers its original scholarship program for children in financial need. It is supported by donations and covers 50% to 70% of the tuition fee.

Our focus was on Study Place Project during our ninth fiscal year (July 2021-June 2022).

① Studying/Learning Support Program for Children facing Financial Difficulties

Study Place Project is operated in three places in Fukuoka. We have also newly established an online course which allows students to participate from home in the ninth fiscal year. We worked on with providing a variety of studying/learning opportunities including programming and inquiry-based learning in order to support students to survive the era of VUCA in the future. All of our activities was provided online during the coronavirus pandemic. Our scholarship program was offered to the students whose households are facing economic hardship as well in order to ensure that all children have access to equitable quality education.

② Planning and Management of Lectures, Events, and Seminars on Child Poverty and Education

In order to advocate for children suffering from the social issues of the educational disparity caused by poverty and to promote our project and program, we held lectures at an university and accepted interviews of a TV program and other media.
